

Dear Hiring Team,

I am writing to express my strong interest in the Data Engineer position. With over nine years of experience as a Senior Information Architect and Data Engineer, I specialize in building resilient, production-grade Spark pipelines and scaling AI-driven data products.

My background directly addresses your core requirements:

- I have architected and owned the end-to-end strategy for high-performance **Azure Databricks** platforms, utilizing **PySpark** and **Python** to manage the full lifecycle from ingestion to "Gold" layer production.
- have a proven track record of building scalable ETL/ELT pipelines with rigorous data-quality standards, leveraging **Data Vault 2.0/ Kimball/ snowflake** to ensure traceable and trusted data foundations.
- led the internal evaluation and deployment of **Apache Airflow** frameworks for cross-company model rollouts and infrastructure automation.
- I have managed data research for supervised machine learning and similarity models, including the development of real-time predictive models and "Co-Pilot" systems using **Azure OpenAI** and **RAG**.

Holding both a **BA in Computer Science & Economics** and an **MBA**, I combine expert-level technical execution with a strategic approach to continuous improvement. I am a native English speaker and am business-fluent in **German (B2)**.

Best regards,

Ran Oren
